

CPAP hose holder

HB-001

360° swivel angle rotation, foldable and lightweight.

The cpap hose holder holds the hose securely to deliver continuous air pressure while you sleep. It also has an adjustable arm that moves with you easily so there's no pulling or tugging of the hose.

By keeping the hose supported, it ensures that the hose doesn't become tangled while you sleep, so your air won't be cut off and you don't need to worry about the mask falling off when you roll over.

Advantages and suggestions for use

- ① 360° swivel ball head, angle rotation.
- ② Metal bends, arbitrary bending, full of toughness.
- ③ Environmental protection ABS material, environmental protection, health and safety.
- ④ Strong centripetal grip, high elasticity spring, high quality, durable, unbreakable.
- ⑤ Easy to install, easy to operate.
- ⑥ According to individual needs, it is recommended to properly adjust the direction of the pipe support and the length of the ventilator line.
